Lazik-Latief

Summary

Frontend Developer with hands-on experience building and deploying responsive web applications for clients and SaaS platforms. Skilled in React.js, Next.js, JavaScript, Tailwind CSS, API integration, and state management. Strong foundation in databases, computer networks, and technical troubleshooting, with the ability to contribute across software development and general IT environments.

Professional Experience

Frontend Engineer, Mohammad Salman 01/2026 – Present
• Developed and maintained React.js and Next.js applications for scalable SaaS platforms.
• Integrated REST APIs, authentication systems, and database-driven workflows.
• Implemented Redux Toolkit state management for complex application features.
• Engineered AI-powered learning modules, dashboards, and interactive course experiences.
• Collaborated in Git-based workflows, code reviews, debugging, and feature delivery.

Software Development Intern, Koshur Scientist 12/2025 – 02/2026
• Developed reusable UI components and interactive course modules.
• Built accordions, dashboards, and progress-tracking interfaces.
• Worked with REST APIs and state management for dynamic content rendering.
• Participated in agile development, Git workflows, and team collaboration.

Web Developer, Freelance 08/2024 – Present
• Delivered responsive business websites using React.js, Next.js, and Tailwind CSS.
• Built modern landing pages focused on user experience and conversion optimization.
• Integrated contact forms, maps, and third-party services for client requirements.
• Managed project delivery from requirement gathering to deployment on Vercel.
• Optimized website performance, SEO fundamentals, and mobile responsiveness.

Education

Bachelor of Computer Applications, University of Kashmir — 09/2023 – 06/2026, India

Frontend Development & Modern JavaScript, Udemy — 04/2024 – 09/2024

Skills

- Frontend Engineering (React.js, Next.js)
- Responsive UI/UX Implementation
- API Integrations (REST, JSON)
- Git Workflows & Version Control
- AI-Powered Application Development
- Technical Problem Solving & Troubleshooting
- JavaScript & Modern Web Development
- State Management (Redux Toolkit)
- Supabase & Backend Connectivity
- Deployment & CI/CD (Vercel, Netlify)
- Agile Collaboration & Problem Solving
- System Analysis & Process Improvement

Projects

Koshur LMS, Learning Management System
• Built a comprehensive LMS with dynamic course delivery, progress tracking, and student-focused dashboard experiences.
• Optimized application performance through component refactoring, API standardization, and reusable frontend architecture.

Rico Marbles, Corporate Business Website
• Designed and deployed a modern business website with responsive layouts, product showcases, and conversion-focused user journeys.
• Implemented performance optimization, SEO best practices, and seamless deployment workflows for enhanced online visibility.

A.R. and Sons, Hardware & Building Materials Website
• Developed a professional company website showcasing products, services, and business information through a clean and intuitive interface.
• Delivered a mobile-first experience with optimized navigation, responsive design, and streamlined customer inquiry workflows.

WHY HIRE ME

I bring a combination of software development expertise, technical problem-solving, and a strong commitment to continuous improvement. From building scalable web applications to supporting IT systems and business technology operations, I approach every challenge with accountability, adaptability, and a results-driven mindset. I am focused on delivering efficient solutions, improving processes, and contributing to organizational success through technology.
